## Classes

In our school, the children enjoy a common learning environment of 16 classes.

Our teaching methods are diverse and stimulate the learning activity of every single child (in order to help our students become good learners).

A daily morning routine of coming together as a class, weekly class councils, class representatives, and student assemblies promote consideration, a sense of responsibility, and the ability to deal with conflicts.

In this way, we encourage a genuine enthusiasm for learning and enable the children to develop learning and social skills, creativity and self-confidence during their school time.

## Our mission statement

Our mission for Lauerholz School reflects a passionate commitment to learning and recognition of the uniqueness of individual learners. We take into account their previous experience and knowledge, in the learning pace and the learning paths.

We provide an environment where children feel safe, happy and secure. They learn with and from each other as much as possible.

We believe our approach will inspire a enthusiasm of learning and unlock the potential that lies within all of our children, preparing them to be independent, confident personalities that are tolerant of others and well prepared for the next stage of their education.

a school for everyone

## Teachers & Educational Staff

22 Primary school teachers  
4 Special education teachers  
10 School attendants  
10 After school supervisors

We treat our students with respect, supporting them in their development with individual help and appropriate learning materials, which we prepare together.

Associated with this is the design of living spaces that encourage learning and development for schoolchildren.

## Buildings and equipment

The children can use a modern school building. This includes a library organised by the children, mobile tablets, presentation techniques in all classrooms, a cafeteria, a newly built gym, a handicrafts room and a math workshop room.

## Outdoor area

Our large, child-friendly outdoor area with playgrounds, school forest, play equipment and a football field offers the ideal setting for relaxation and activity.

## Parenting Work and Associations

Our students' parents see themselves as part of our culture of participation and responsibility for school life.

Together we strive for an open, constructive cooperation in favor of the development of each individual child.

## Supervision & courses in the afternoon

At both school locations there is the possibility of childcare.

Israelsdorf: 7.15-16.00  
Karlshof: 7.30-16.00
